CAREER OBJECTIVE

As a skilled and motivated developer, I am passionate about creating intuitive and interactive web frontend applications. In addition to my technical expertise, I have demonstrated the ability to adapt to various situations and have the potential to drive my own and others' growth. As a team player, I possess excellent interpersonal communication skills, problem-solving abilities, and clean coding practices. I also have a proactive approach to learning and am constantly seeking opportunities to expand my skill set.

WORK EXPERIENCE

React.JS Developer at Code Ninja Consulting [12/2021 – Present]

Code Ninja is a solutions provider specializing in Mobile and Web Applications. I have a proven track record of delivering successful projects at Code Ninja. The following are the project that I've worked on:

- **24seven:** is an online selling website, the goal of this project is to support small businesses in the community by establishing a network of reliable resellers shops and helping them grow through branding and digitization. The Front-end is based on ReactJS with the back-end being in NodeJS and Linking the data with Magento.

- **Inventory Forecasting Dashboard:** Developed inventory forecasting dashboard that provides various useful elements to users, such as sales forecasting, inventory forecasting, overstocked items, and various sales reports. This dashboard is highly beneficial for businesses as it can solve problems and help the company grow. My core responsibilities developing the front-end using ReactJS and the back-end is implemented using the Django REST APIs in the Python framework.

- **Push Notification Application:** Developed notification manager app to facilitate the sending of push notifications to users. The app will allow the administrator to easily send notifications to their registered users, for instance to announce sales or promotions. My core responsibilities developing the front-end using ReactJS, while the back-end is constructed using PHP GraphQL.

- **Funoonee**: Funoonee is an online marketplace that operates in Riyadh and specializes in connecting customers with handymen for hire. My primary role within the company was to collaborate with other team members and concentrate on a specific aspect of the project, specifically the frontend. This involved working closely with my colleagues to ensure the successful development and implementation of the frontend functionality for the platform. The Front-end is based on NextJS with the back-end being in NodeJS.

- **Makhdoom Web Application:** The Makhdoom app is a transportation service platform that allows users to choose from a variety of options according to their needs. It also offers a range of features, including the ability to track deliveries. I am currently in the process of working on this project. My core responsibilities developing the front-end using ReactJS and the back-end is implemented in NodeJS.

Frontend Web Developer at DevForTech [08/2021 – 12/2021]

I was employed as a frontend developer for a company for approximately 4 months and later secured a full-time position at Code Ninja Consulting. During this time, I utilized the opportunity to enhance my abilities by working on multiple projects. The following are the project that I've worked on:

- **Veta Music:** I was responsible for developing some components of the Veta music React application, starting from scratch and ensuring their core functionality was in place. One of the features I built was the ability for musicians to upload their albums for distribution. Additionally, I worked on the administration section to add extra features. The project was successful and the team member was pleased with the results. My core responsibilities developing the front-end using ReactJS, while the back-end is constructed using NodeJS.
- **Mynty:** I created the front-end of this website from the beginning. The website offers a range of gaming services that can be purchased through its online platform. I utilized HTML, CSS, JavaScript, Bootstrap to build it.
- **MINERVA:** I created a website for a dentist's practice, including features such as appointment scheduling and additional information. I utilized HTML, CSS, JavaScript to build it.

EDUCATION

Bachelors in Computer Science – CGPA (3.23 / 4.00) – Dean's Honor List Award

COMSATS University [2017 – 2021]

Intermediate in Computer Science

Punjab College [2015 – 2017]

LANGUAGE SKILLS

Mother Tongue: Urdu | **Other Language:** English

SKILLS

Coding Skills

- React.JS
- JavaScript
- HTML / CSS
- Tailwind CSS
- Bootstrap
- Styled Components
- Antd Design
- Flex box & Grid layout
- Firebase
- APIs integrations, Git & Jira

Additional Skills

- Next.JS (beginner)
- Node.JS (beginner)
- TypeScript (beginner)

Tools

- Adobe XD
- Figma
- Visual studio code
- Docker

Strengths

- Time Management
- Motivated
- Teamwork & Creativity
- Hardworking
- Organizational Skills

CERTIFICATIONS AND MEMBERSHIPS

Html & CSS Course   *Coursera* – Apr 2021

JavaScript Crash Course   *Udemy* – July 2021

React.JS Advance Course   *Coursera* - Aug 2022
